EDUCATION

Gandhinagar University

Bachelor of Technology in Computer Science (AI)

Gandhinagar, Gujarat

Aug. 2024 – May 2027

Gujarat Technological University

Diploma in Computer Engineering

Bhuj, Gujarat

Aug. 2021 – May 2024

EXPERIENCE

Web Development Intern

Generation X

Aug. 2023

Junagadh, Gujarat

- Developed a dynamic customer interaction platform for lead management using **Django**, integrating **HTML**, **CSS**, and **JavaScript**
- Implemented backend functionalities for form submissions

Front end Developer

DIT Interactive

Sep. 2022

Bhuj, Gujarat

- Developed static web pages using HTML and CSS, focusing on semantic structure, responsive layout, and accessibility principles
- Implemented responsive design using Bootstrap 5, including grid system, cards, navbars, and utility classes to optimize cross-device compatibility
- Gained hands-on experience in front-end UI design, building basic landing pages and forms that follow modern web standards and mobile-first design

PROJECTS

Titanic Survival Prediction | *Python, Sklearn*

August 2025

- Engineered a machine learning pipeline using **Python** and **Scikit-learn** to predict passenger survival on the Titanic, achieving over **80% classification accuracy**.
- Implemented data preprocessing steps, including **feature engineering** (e.g., extracting 'Title' from name), handling missing values via imputation, and one-hot encoding categorical variables.

Guess The Number | *Python*

June 2021

- Developed a Python-based CLI game that generates a random number and allows users to guess it within a limited number of attempts using conditional logic and loops
- Practiced basic programming constructs like functions, loops, conditionals, and randomness to build a beginner-friendly game logic

TECHNICAL SKILLS

Programming Languages: Python, SQL (Postgres), Java, C/C++, JavaScript, R

ML/AI Frameworks: **PyTorch** (Added), Sklearn, TensorFlow

Data Analysis/Viz: Pandas, NumPy, **Matplotlib**, **Seaborn**, Highcharts (Removed)

Backend/Web: Flask, Django, TailwindCSS, Bootstrap, Vanilla JS

Cloud/Tools: Google Cloud Platform, VS Code, Git/GitHub
